

NORTH TABLE MOUNTAIN WATER AND SANITATION DISTRICT

14806 WEST 52ND AVENUE, GOLDEN, COLORADO 80403-1228

## NORTH TABLE MOUNTAIN REPORT – JANUARY 2014

[WWW.NTMWATER.ORG](http://WWW.NTMWATER.ORG)

### WINTER QUARTER AND YOUR SEWER BILL!!

Residential sewer charges for our metered customers are based on the water usage during the winter months. This is the time of year when most customers are not using water for irrigation, washing cars, or other outside uses or activities.

- **Your winter quarter months are December, January, and February.**
- The sewer charge is based on 130% of the water charge during these three months.
- Your new sewer charge will be billed in March and remains the same for the remainder of the year.

For instance, if you use 20 thousand gallons of water during your winter quarter, your water charge would be \$73.70. Based on your water charge we would calculate that your sewer bill would be \$95.81. Your sewer bill would then remain at \$95.81 until the following year. (There can be changes to this set amount only if a rate increase takes affect during the year.)

The District has a minimum charge for water and sewer which is based on 5 thousand gallons. The minimum quarterly bill for water and sewer service combined is \$36.69. All new customers to the District start at a minimum sewer charge of 15 thousand gallons until they have established their own winter quarter usage.

*Making sure you don't have any leaks during these winter months can keep your sewer charge down, and save you from paying for unnecessary water going down the drain.*
